Nightpost

One private app for your people, plans and money.

Chats, circles, moments, plans and payments on Solana.
One app instead of six.

Android · build 17 · Solana devnet · October 2026

PROBLEM

A plan with friends crosses six apps. It leaks at every hop.

1 **Map** find the place

2 **Chat** agree on it

3 **Poll** pick the time

4 **Screenshot** share the pin

5 **One person** pays for everyone

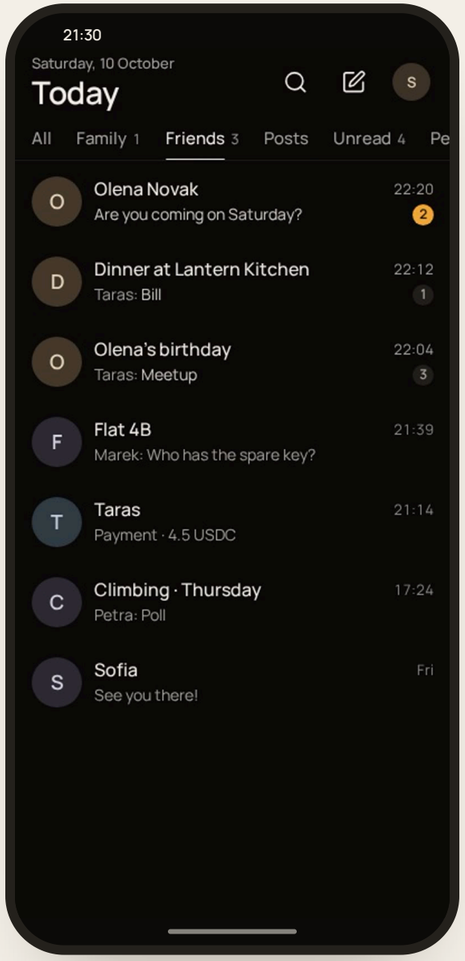

6 **Split app** chase the rest

46% of people owed money by friends or family feel too awkward to ask for it back.

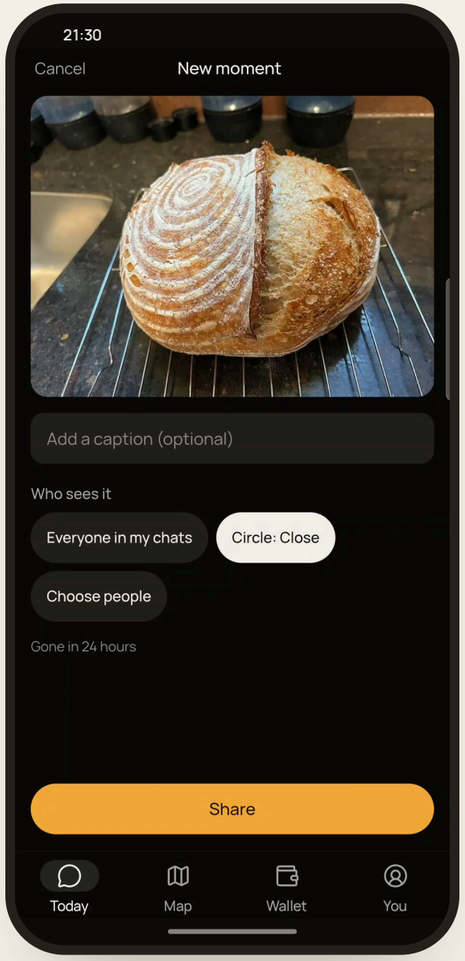

Source: Starling Bank survey by Opinium, 2,000 UK adults, June 2023, published 7 July 2023.

PRODUCT

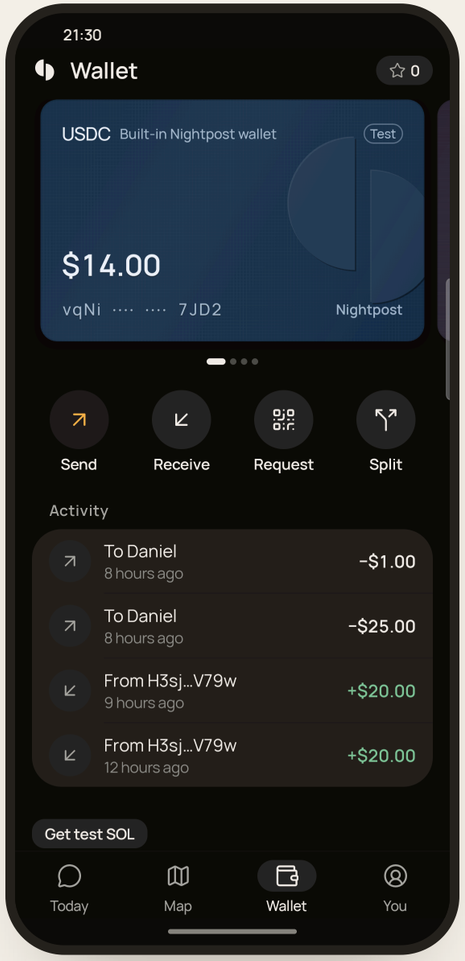

Everything a phone is for, joined into one space.

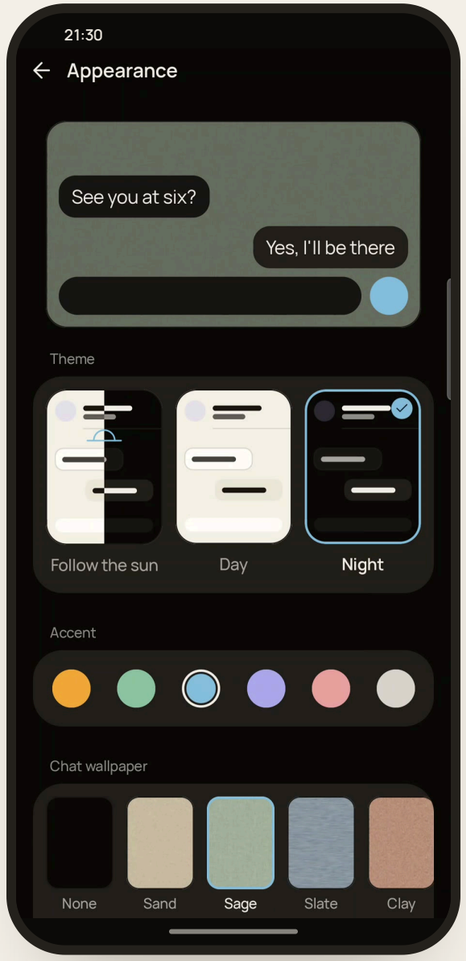

People in circles

Moments for one circle

Wallet on Solana

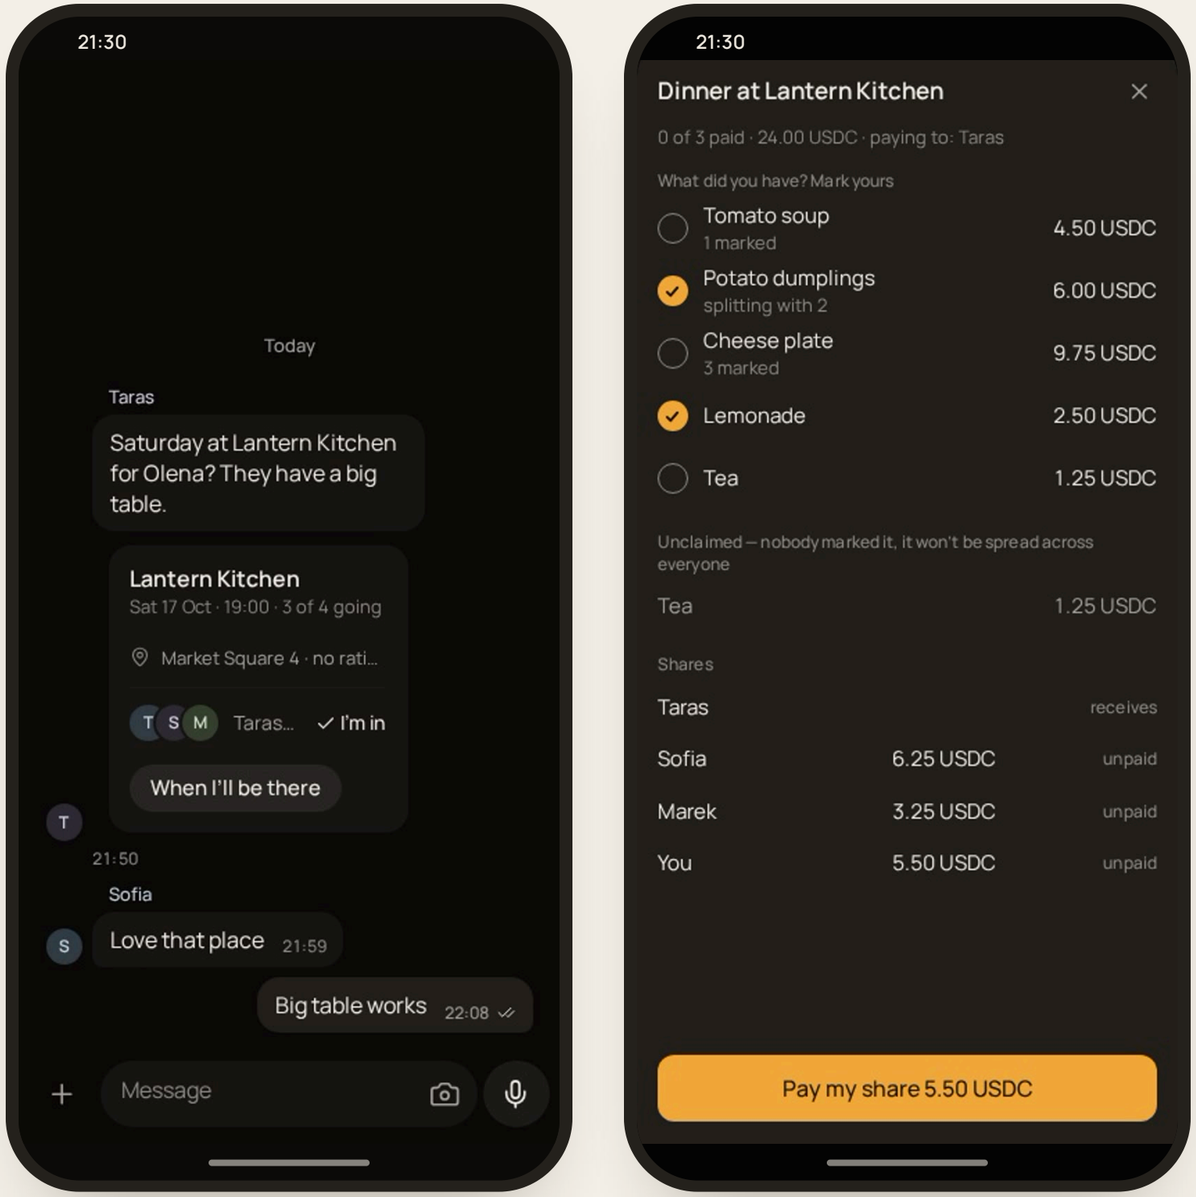

Made yours

PLAN TO PAY

Plan it in the chat. Pay your share right there.

Say you’re in. Tick what you had. Pay your share in USDC, confirmed with your fingerprint.

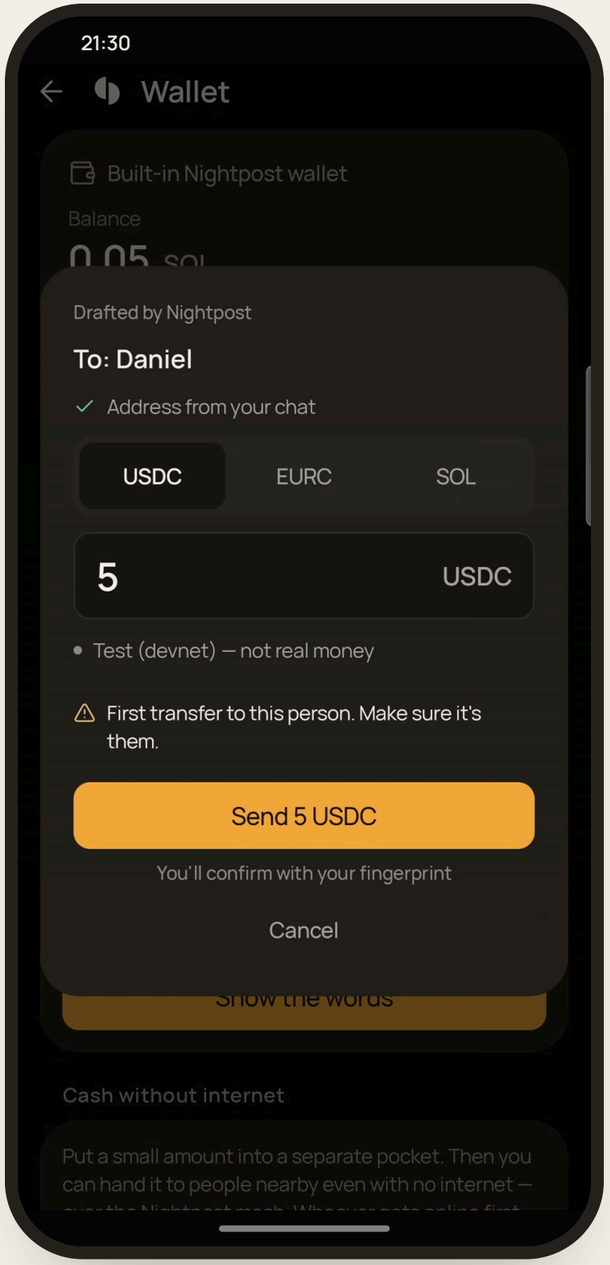

Build 17. Test contacts, devnet test funds.

ASSISTANT

Ask once. It drafts. You confirm.

“Send 5 USDC to Daniel” becomes a ready transfer. The assistant never sends. Your fingerprint does.

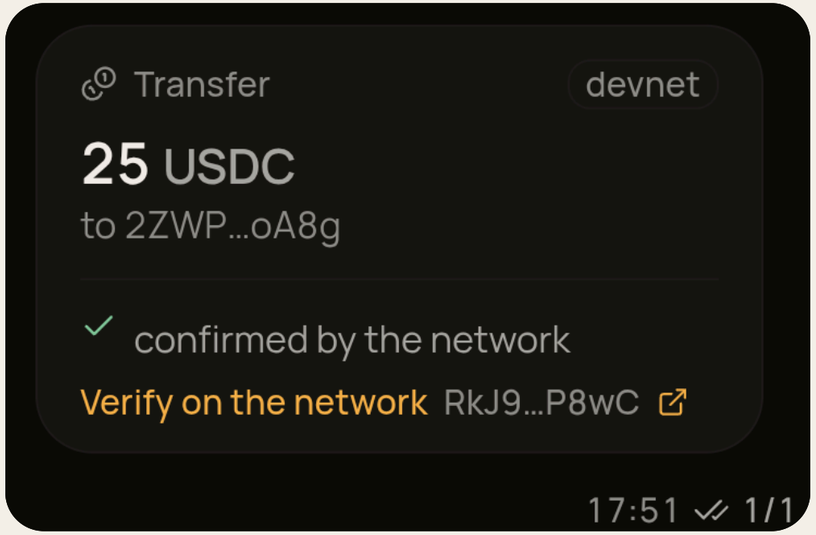

Build 17. Test contacts, devnet test funds.

ON CHAIN

Every share is a real Solana transaction.

The bill's id rides in a Memo, so anyone can match a payment to its bill.

In the chat, build 17

HOW IT'S BUILT

Phone to phone, through a relay that can't read your messages.

Also: React messenger inside the app, WebRTC calls, MapLibre and OpenStreetMap.

WHY NOW

Payments can finally live where plans are made.

JUNE 2024

MiCA

EU rules for stablecoins apply.

AUGUST 2025

Seeker

Seed Vault and the dApp Store reach people's pockets.

OCTOBER 2026

0.000005 SOL

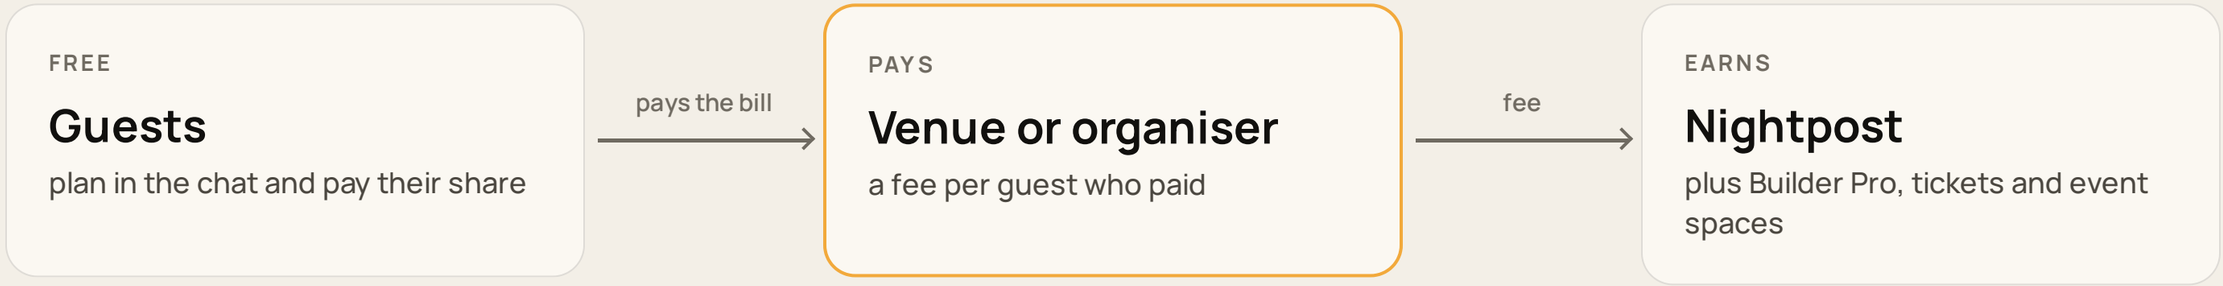

The network fee on our 25 USDC transfer.

Regulation (EU) 2023/1114, art. 149: titles III and IV apply from 30 June 2024. Solana Mobile blog: Seeker shipping began 4 Aug 2025. Fee: devnet tx RkJ9…P8wC.

BUSINESS MODEL

People never pay to talk, meet or send money.

Venues and organisers pay: a fee per guest who paid, Builder Pro, tickets and event spaces. Optional Plus adds more assistant, voice and storage. Wallet swaps carry a small fee.

Optional Plus more assistant, voice and storage

Wallet swaps a small fee

Venues get paid in USDC by QR or in the chat. No card terminal, no card fees.

No revenue yet. Payments run on devnet.

STATUS

Build 17 runs on Android today. Payments run on devnet.

17
Android build, 11 October 2026

8,301
Android tests green at the freeze

2,427
web messenger tests green

26/26
Android modules green

No users yet beyond our own test phones. Hackathon work starts on 14 September 2026; the messenger and map existed before.

Release gate of build 17 on the freeze commit, 11 Oct 2026; web: Vitest on the same commit.

NEXT

Next: an audit, then mainnet payments with the first venues.

We're looking for an accelerator and those first venues.

NOW

Build 17 on Android. Payments on devnet.

NEXT

An audit. Then mainnet payments with the first venues and student groups. Planned: Bridge by Stripe for cash in and out.

THEN

Builder: places and organisers run their own page and get paid in the chat. Nightpost on your computer.

Nightpost

Free on Android.
Early build.
