Nightpost

Everything your phone is for, joined.

Talk, circles, map, moments and money in one space, for people who live in groups. An assistant drafts across it; you confirm.

WHAT IT JOINS

● Talk	Built
● Map	Built
● Money	Built · devnet
● Assistant	Built · payment drafts
● Calls	Build 18
● Builder pages for places	Build 18
○ Circles	Next
○ Moments	Next
○ On your computer	Next

PROOF IT RUNS

Talk, map and a devnet wallet run on a phone today.

Devnet

A token transfer confirmed on Solana devnet at slot 506,800,570 on 02 Oct. Test funds only.

7,649

Kotlin tests pass and none fail, 25 skipped. From the JUnit reports of the build-17 branch, run 07 Oct. The app module is counted once.

STATUS Money is devnet only: test funds, no real money. The tests ran on the build-17 branch; build 18 is in progress.

Devnet transaction 5u377J…i3JT, checked on api.devnet.solana.com on 09 Oct 2026. Tests: JUnit reports of branch cloud/r17, run 07 Oct 2026.

WHY THIS EXISTS

Every job your phone does lives in a separate app, and you are the glue.

Everyone who lives in groups feels it every day.

1. Plans are made in a chat; the place lives in a map app. You copy addresses.
2. Money lives in a bank app. You send screenshots and chase friends.
3. Family, friends and work share one contact list, and all of them see the same you.
4. Assistants see one app at a time, so they can’t help with real life.

18

different apps a day for the average smartphone user in the US

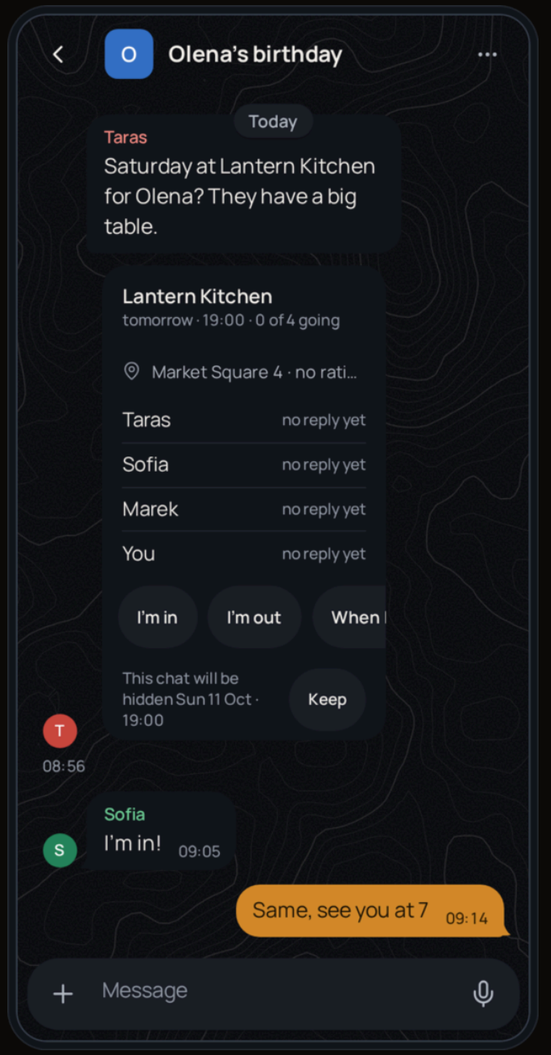

Reported by RealityMine (US panel, July 2025 data), 16 Sep 2025. We found no credible EU figure.

THE ANSWER

One space where your people, places, plans and money know each other.

Nightpost joins talk, circles, map, moments and money in one app, with an assistant across all of it.

1	A plan in a chat becomes a meetup card: place, time, who's coming.	Build 18
2	Pay or split right where the plan was made.	Pay: built · Split: build 18
3	Circles for family, friends and work. Each sees only what you choose.	Next
4	The assistant turns one sentence into a draft you confirm: a payment today, a whole plan next. OUR EDGE	Payments: built · Plans: next

Meetup card in a group chat, build 18. Demo names.

HOW IT WORKS

You say what you want. Nightpost joins the pieces. You confirm.

1 YOU SAY

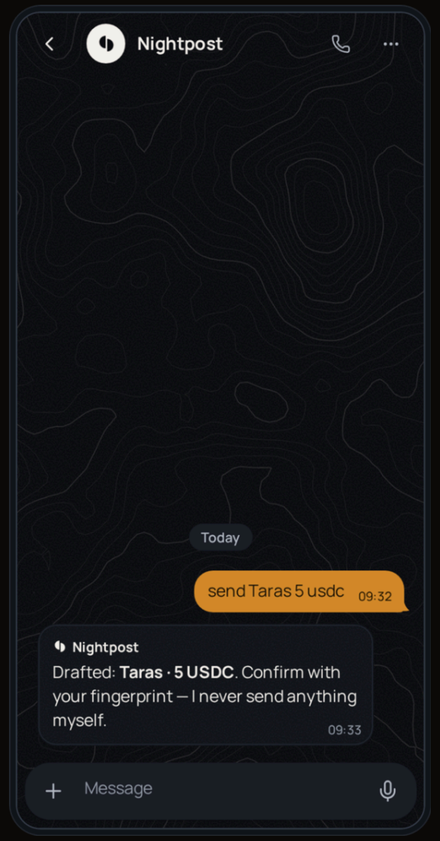

“Send Taras 5 USDC.”

2 NIGHTPOST JOINS

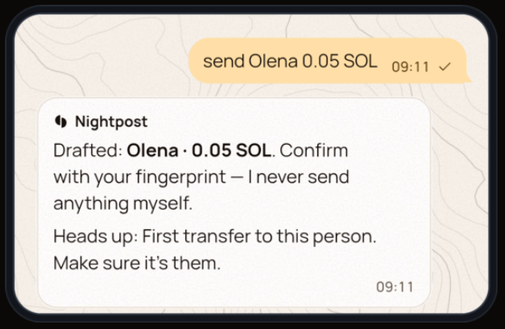

It finds Taras among your people, takes his wallet address from your chat and fills in the payment.

3 YOU CONFIRM

Your fingerprint sends it. The assistant never sends anything by itself.

Build 18 interface, demo names.

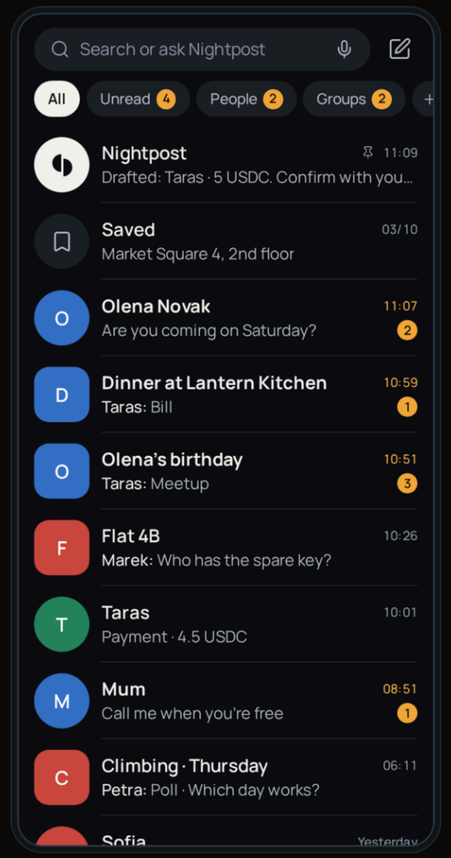

Captured on a phone, one exchange. Test funds.

● Built · devnet — Today this covers payments between your people.

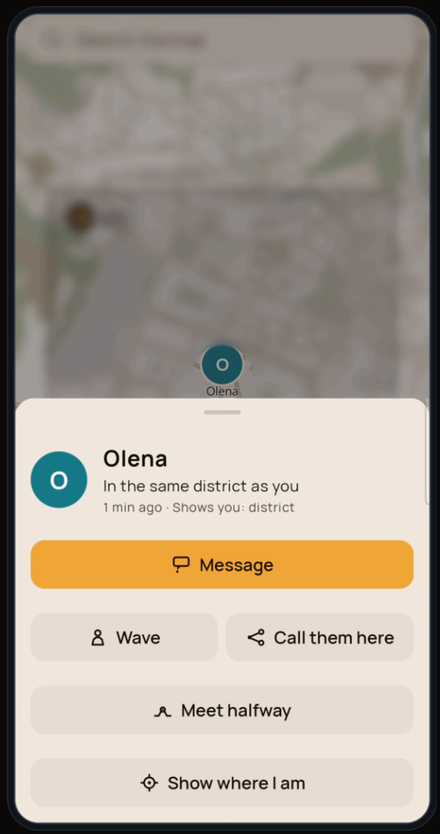

○ Next — The same three steps for a whole plan: “Olena’s birthday is on Saturday” becomes the group, the table and the gift.

Talk, map and money run on a phone today. Splits and calls arrive in build 18.

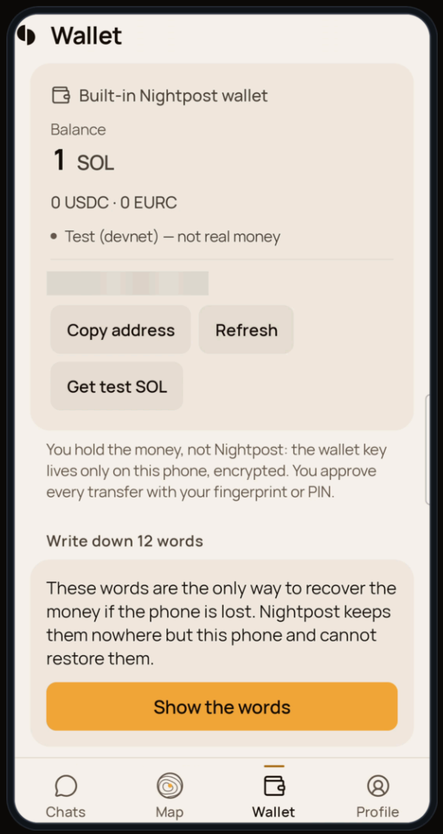

Built Chats

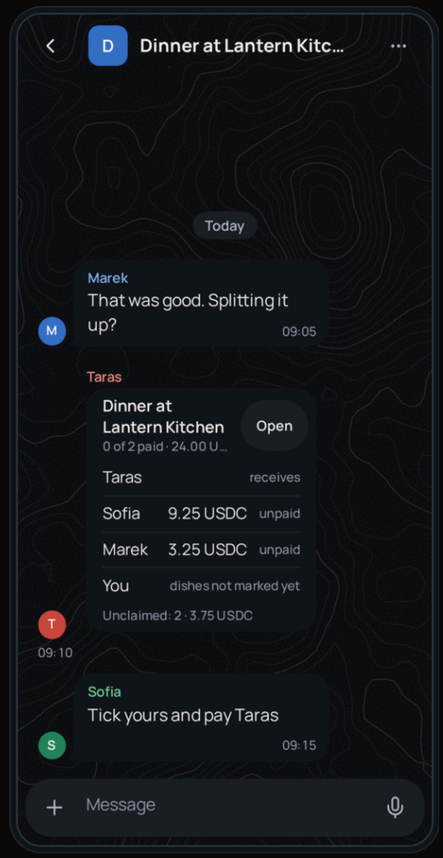

Built Map

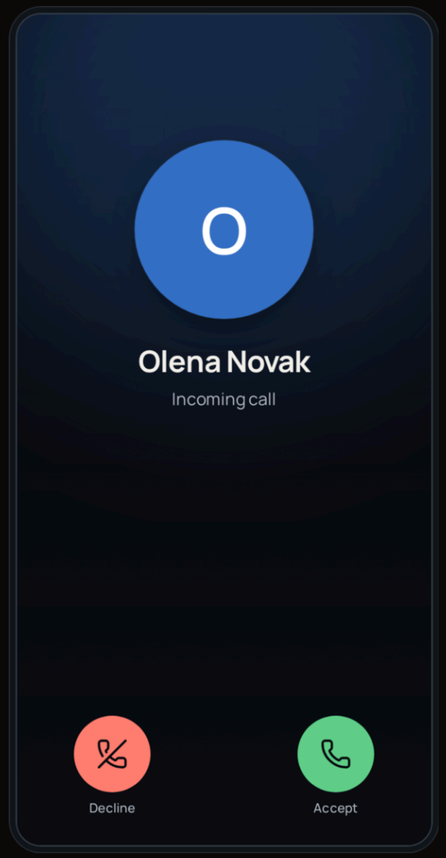

Built · devnet Wallet

Build 18 Split

Build 18 Calls

Status on 09 Oct 2026. Map and wallet were captured on a phone with test funds; the map is blurred for privacy. Chats, split and call show the build-18 interface with demo names.

WHY NOW

Assistants got cheap, euro stablecoins got legal, and wallets got a phone.

~10×

cheaper each year: AI answers at equal quality. An assistant can now read every plan, not just a few.

a16z, “LLMflation”, 12 Nov 2024

€400M+

EURC in circulation. USDC and EURC are issued in the EU under MiCA since July 2024.

Circle, 01 Jul 2024 · 17 Aug 2026

175k+

Seeker phones sold, each with a wallet inside; 1,561 apps in the Solana dApp Store.

Solana Mobile, MWC exhibitor page (self-reported) · Solana Compass, 26 Jun 2026

MARKET

Places already pay for each customer they get: TheFork alone earns $221M a year.

WHO EARNS	HOW IT EARNS	REVENUE
TheFork	Fee per seated diner plus subscription; 50,000+ restaurants	**$221M · 2025**
OpenTable	$1.00–1.50 per guest plus $149–499 a month (reported)	**not disclosed**
Eventbrite	3.7% + $1.79 per paid ticket (reported)	**not shown**
Luma	5% per ticket on the free plan, 0% on Plus	**not disclosed**

Tripadvisor 10-K and Q4 release FY2025 · Eat App blog, 24 Apr 2026 · Luma help centre · TickPick on Eventbrite fees, 2026

WHERE WE START: FOOD AND DRINK

1.55M

businesses in the EU with €450.8B turnover a year (Eurostat, 2022). Shops, events and services come next.

FIRST TARGET · ESTIMATE

€0.25–1M

a year from 0.1% of guest payments in Czechia at €1–4 each. The EU at the same share: €18–72M. Assumes €25 per guest; that figure is ours.

BUSINESS MODEL

People pay nothing. A place pays €1–4 for each guest who paid through Nightpost.

1 A fee per paying guest, invoiced in euros: €1–4, that is 4–16% of a €25 bill. A place pays only for results.

2 A free Builder page: menu, hours, events, bookings.

● Build 18

3 Points and cashback funded by places, so regulars come back.

○ Next

We take no cut from payments between people until we have legal advice on PSD2.

UNIT ECONOMICS PER PLACE · ESTIMATES

ARPU	50 paying guests a month × €2, per year	€1,200
CAC	a local rep's time plus one free month	€300
LTV	2 years at 80% gross margin	€1,920
LTV / CAC		6.4×

Benchmark: TheFork earns about $4,400 per restaurant a year ($221M ÷ 50,000; our division of its filings).

Revenue today: €0. All unit figures are our assumptions.

GO-TO-MARKET AND TRACTION

We start with university students, then grow circle by circle across the EU.

FIRST USERS

330,547
university students in Czechia

19.07M
university students in the EU

THE LOOP

1 One active student brings their circles.

2 Circles talk, plan, share and pay in one space.

3 Places they visit get a free page and invite their regulars.

↺ Every new person brings their own circles.

TODAY, HONESTLY

Solana devnet **Test funds** **Public Android build**

Pilot metrics we will report: active circles a day, messages, people sharing their place, payments, places with a page.

ON CHAIN

A token transfer confirmed on Solana devnet on 02 Oct.

Czechia: ČSÚ, 23 Apr 2026 (end of 2025) · EU: Eurostat, 2024

COMPETITION

Each big app owns one slice of your life. Nobody joins them.

APP	THE SLICE IT OWNS
Telegram, WhatsApp	Talk
Google Maps	Places
Instagram	Moments
Revolut, Tikkie	Money
Partiful, Luma	Invites
Nightpost	All of it, joined, with an assistant across

WHAT WE ADD

One assistant sees your people, places and money, so one sentence can start a payment today and a whole plan next.

● Payments: built ○ Plans: next

Built for Seeker: wallet, identity and SKR inside the chat.

Wallet	External wallets connect through Mobile Wallet Adapter. Keys stay in the wallet.
Seeker verified	Sign in with Solana. Our server checks the Seeker Genesis Token on mainnet and signs a “Seeker verified” mark.
SKR stake tier	Payment cards show the mark with the stake tier: staker, 1k+ or 10k+ SKR. Friends’ phones check the signature themselves.
SKR payments	SKR works as a payment token in chat, on mainnet only. Devnet has no SKR.
dApp Store	Publisher KYC is done. The listing is the next milestone.

Code: core-solana WalletActivity, SeekerClaim, SeekerBadge, Money; server seeker.py. Build 19 branch, 10 Oct 2026.

WHERE THIS GOES

The one place where your people, plans and money meet: on your phone first, your computer next.

Build 18	Calls, @nicknames, meetups with split, Builder pages for places
Next	Circles with their own rules, moments, gifts, whole plans from the assistant, the space on a computer
Then	Real money, after an independent security audit
The ask	$10–20k from the Solana Mobile grant. Milestones: Build 18 on devnet, then a Solana dApp Store listing.

FOR EVALUATORS Use two phones and add each other by QR. In the wallet, tap “Get test SOL”, then pay in the chat. Devnet only.
